Cybersecurity and IT Professional | Master's in Cybersecurity | AWS Solutions Architect | DevOps | IT Management

Dallas-Fort Worth Metroplex

Summary

As a highly skilled and certified cybersecurity and IT professional, I have a strong foundation in network administration, security, and cloud computing. With my Master's in Cybersecurity and AWS Solutions Architect certification, I am well-equipped to design, implement, and manage secure and scalable cloud-based solutions for businesses of all sizes. I have a proven track record of success in both technical and management roles, and I am always eager to learn and stay up-to-date on the latest technologies and best practices in my field.

Experience

Anthill

Cyber Security Specialist

April 2022 - Present (1 year 4 months)

Chicago, Illinois, United States

• Successfully implemented IT GRC processes and procedures, resulting in a 50% reduction in security incidents.

• Develop and implement a cloud security strategy that achieves SOC2 and GDPR compliance.

• Lead the design and implementation of a cloud computing platform, resulting in a 30% increase in system performance and reliability.

• Coordinate disaster recovery plan to avoid major cyberattack, resulting in minimizing downtime and data loss.

• Manage the G Suite for the organization, streamlining communication and collaboration across teams.

• Ensure HIPPA compliance through regular audits and training sessions for all employees.

• Implement systems engineering best practices, resulting in a more efficient and secure IT environment.

MayTech Partners Co

IT Consultant

January 2021 - April 2022 (1 year 4 months)
Missouri, United States

• Advised clients on cybersecurity strategies and solutions to enhance their overall security posture.
• Conducted security assessments and audits to identify vulnerabilities and develop remediation plans.
• Assisted clients in achieving compliance with industry regulations and standards, including SOC2, GDPR, HIPAA, NIST, and ISO 27001.
• Provided guidance on incident response, disaster recovery planning, and business continuity measures.
• Delivered training and workshops to educate clients on cybersecurity best practices.

Kirkwood Community College
Technical Support Specialist
August 2018 - May 2019 (10 months)
Cedar Rapids, Iowa, United States

• Conducted risk assessment and data processing system performance tests, resulting in the successful configuration of security settings for data processing and network access.
• Successfully installed firewalls and encrypted data to secure confidential information.
• Implemented updates to virus protection systems based on computer virus reports, resulting in a 99% reduction in malware infections.
• Conducted regular scans of networks and security systems, identifying and addressing vulnerabilities in a timely manner.
• Assisted with the implementation of a new security system, resulting in a 50% improvement in overall security posture.
